To meet Nissan's dealership modernization requirements, Jaremko Nissan remodeled 8,400 SF and added 5,200 SF to the existing dealership. The exterior remodel of the building was centered around the iconic Nissan emblem. Drawing from the linear features of the symbol, the exterior is clad in aluminum louvers, aluminum composite metal cladding, and a clean uninterrupted glass storefront. The aluminum and glass storefront allows natural light to extend into the interior customer lounge, retail area, and automotive showroom. The showroom incorporates upscale floor tiles with elaborate lighting 'clouds' accenting the showcase vehicles.
